

Professional-grade horticultural LEDs with an eye-pleasing, proprietary spectrum optimize plant growth while minimizing power usage.

Sturdy frame with flexible shelf height options and easy access to growing trays.

Easy-to-use app that automatically controls the light and pump intervals.

Easy-access large capacity reservoir makes managing nutrient solutions simple and efficient.

Designed and tested in Canada - each Terrace Pro comes with a 90-day performance guarantee.

Features of the Terrace Pro

Integrated airflow system encourages active plant growth and reduces risk of plant loss due to disease.

Custom-designed growing trays with a patented drainage design provide a strong base for your plants.

Designed to fit with any home or office décor and keeps your growing supplies and plumbing lines accessible but out of sight.

Don't let the compact design fool you... the Terrace Pro delivers high production capacity compared to other indoor gardens without any special hookups required for heating, cooling or ventilation.
